Low volume application flat fan nozzle

Low volume application flat fan nozzle:

- ▶ Spray angle 80°:
design that reduces the proportion of very fine droplets, the risk of drift and the risk of clogging despite the small size
- ▶ Working pressure: 1.5 to 5 bar
large working pressure range while minimising droplet size variability (200 to 350 µm)
- ▶ Ceramic insert:
significant reduction in wear rate to ensure precision and quality of the spray spectrum in the long term

USE CASES:

Particularly suitable for applications:

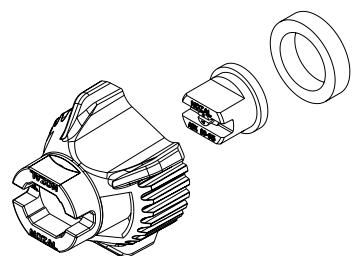

- ▶ requiring very good coverage.
- ▶ with mode of action by contact.
- ▶ low volumes of high precision.

Compatibility: standard / multi-nozzle / PWM
